

UTM RTSE 2026 SPEED TRIALS 2D

RACE AGAINST TIME,
MASTER REAL TIME SYSTEM ENGINEERING

60 SECONDS

MAX SPEED

HIGHEST SCORE

SPEED TRIALS 2D

PHASE 1 GAME RULES

OBJECTIVE

- Survive for 60 seconds
- Maximize distance travelled
- Optimize speed under constraints

CORE GAMEPLAY

AI control in Unity using real-time camera input. Performance tied to efficiency, reaction, and stability under corruption.

SCORING FACTORS

- Distance covered
- Speed consistency
- Event success rate
- Penalty minimization

DYNAMIC EVENTS & TOKENS

● **Green:** +10% speed

● **Red:** -20% speed

● **Yellow:** Randomized :

20% → Next token type hidden

20% → Tokens invisible for 5s

20% → Camera input delay (5s)

20% → Action output delay (5s)

20% → Corrupted camera input (5s)

EVENTS

TRAILING CAR:

Must switch lanes before collision or -50% speed.

POLICE:

Catch next Red Token or -50% speed.

LOW BRIGHTNESS:

Turn the light ON or All tokens Yellow.
